

INTRODUCING the BEST Solution for Vertical Batten Structures

NO HORIZONTAL BATTENS REQUIRED!

Strong aluminum channels securely hold specially engineered VIVA field shingles, replacing the need for wood battens. The system can be installed directly to vertical rafters with spacing up to 32" (813mm).

- ✓ **NO SAGGING BETWEEN RAFTERS**
- ✓ **LESS WOOD, LESS FIRE RISK**
- ✓ **SAVES TIME AND MONEY**

Similar to natural thatch, VIVA palm is weatherproof when installed on an open batten structure.

COLOR OPTIONS

4 Easy Steps to a New VIVA Thatched Roof

- Call 866-408-1197 and talk to one of our friendly thatch experts.
- Choose your desired color and texture.
- Get a quote and order.
- Enjoy your beautiful, durable, maintenance-free VIVA palm thatch roof.

Quick, easy installation that can be DIY or professionally installed.

20 Year
Warranty

Perfect for any size project, the VIVA thatch zip channel system replicates natural palm leaf thatching on any vertical open batten structure without the need to install horizontal wood purlins. This system further reduces fire hazard and makes installation quick and easy. VIVA provides decades of maintenance-free performance without the problems that can be encountered with natural thatch.
